

**Position:** Senior React.js Developer

**Location:** Bhubaneswar

**Experience:** 5+ years

**About Role:**

We are looking for an experienced and talented Senior React.js Developer to join our team. As a Senior React.js Developer, you will be responsible for developing and implementing user interface components using React.js concepts and workflows such as Redux, Flux, and Webpack. You will also ensure that these components and the overall application are robust and easy to maintain:

1. Develop new user-facing features using React.js.
2. Build reusable components and front-end libraries for future use.
3. Optimize components for maximum performance across a vast array of web-capable devices and browsers.
4. Work closely with UX/UI designers to translate wireframes and designs into high-quality code.
5. Collaborate with back-end developers and external teams to improve usability.
6. Stay up to date with emerging technologies and industry trends and apply them into operations and activities.
7. Identify and correct bottlenecks and fix bugs.
8. Maintain code integrity and organization.
